Dear participants, Dear speakers,

It's a great pleasure to welcome you to Bern for this preceptorship focused on EMERGING CHALLENGES IN THE MANAGEMENT OF CHRONIC LIVER DISEASE.

The development of novel diagnostic methods and the current availability of highly effective treatments of viral hepatitis are the result of an intensive research work in the clinic and in the laboratory over the last years. Thanks to these innovations, hepatology is experiencing a unique opportunity to improve the results of management and therapy.

The challenge of young physicians and hepatologists is now to learn and to transform these progress into advantages for the patients. Therefore, more than ever there is a need for opportunities like this course to learn and to discuss about these innovations.

I would like to thank all the members of the faculty for their contributions to this preceptorship, the organizing team including Bettina Endres, Corinna Oberle and Brigitte Jakob and our sponsors for their generous support.

I am looking forward to a fruitful preceptorship and I wish you a nice stay in Berne.

Prof. Dr. med. Andrea De Gottardi
