5th annual HEP Preceptorship

CHRONIC LIVER DISEASES: MECHANISMS, DIAGNOSTIC CHALLENGES AND CLINICAL MANAGEMENT

GenerationenHaus
Berne, Switzerland

MAY, 24–25, 2018

Final Program

HEP Preceptorship

Dear participants, Dear speakers,

It's a great pleasure to welcome you to Berne for this preceptorship focused on CHRONIC LIVER DISEASES: MECHANISMS, DIAGNOSTIC CHALLENGES AND CLINICAL MANAGEMENT. After the breakthrough in the treatment of hepatitis C, other liver disorders including metabolic and rare liver diseases are now challenging hepatologists.

Therefore, there is a need for opportunities like this course to learn and to discuss about innovations in the diagnostic and treatment of these conditions. I would like to thank all the members of the faculty for their contributions to this preceptorship, the organizing team including Bettina Endres, Corinna Oberle, Titu Staubli and Brigitte Jakob and our sponsors for their generous support.

I am looking forward to a fruitful preceptorship and I wish you a nice stay in Berne.

Prof. Dr med. Andrea De Gottardi
